

HAMMOCK

TREE STRAPS

Congratulations on your purchase of the Hammock Tree Straps that allow you to hang your hammock on any tree without hooks.

Included In This Package:

2 - Tree Straps

2 - "S" Hooks

Hanging Instructions:

Select a location in a tree approximately 4'6" from the ground and wrap the strap around the tree by sliding the non-looped end through the loop.

Continue looping around the tree until there is not enough strap to do it again. Make sure the strap is positioned in such a way that it does not come into contact with any limbs or other objects. Continued contact may chafe the strap during hammock use.

This will weaken the integrity of the strap and possibly result in breakage. Hook your "S" hook into the ring at the end of the tree strap. Repeat for the opposite tree.
